Its going well. We will be taking some samples tomorrow because HQs and RA are worried about the PPH and knowing what exactly was spilled. Freedom has the product that was removed from the tank stored at Poca Blending facility where we can access it. I am doing well, enjoying it :) Fran made a really good buffer between the field and management when it was released that it wasn't just MCHM that was released.

Melissa hi
How is it going? Are you ok?

Hey Dennis wanted to let you know I touched base with Ex. 7(a) Enforcement and we will be providing a copy of the photo log thus far, msds, polreps, hot site reports, NRC reports and air monitoring maps via a thumb drive for him to aid in the investigation. Then I figure upon our arrival we can provide him those items produced after we give him what we have thus far.

Melissa
